

CASE MERIT VETTING TOOL FOR MEDICAL MALPRACTICE CASES

PLAINTIFF & DEFENSE

Expert will perform blind, bias-free review of your case disguised with other cases.

Unbiased, HIPAA-compliant radiology reviews that eliminate the ‘lawyer effect,’ strengthen settlement leverage, and provide credible expert testimony that stands up in court.

PROMO SPECIAL: Add-on fee with expert retention: \$1000

(i.e. retainer is 6k instead of 5k)

- **Eliminates Radiologist Bias**
 - Blinds radiologists to which exam is in dispute by embedding it among routine cases.
 - Removes the “lawyer effect” (expectation of error when handed a case by an attorney).
- **Strengthens Legal Position**
 - Used in over 450 actions nationwide.
 - Improved settlement leverage and contributed to favorable verdicts.
- **Transparent & Defensible Process**
 - HIPAA-compliant imaging archive and procedures.
 - Board-certified radiologists with subspecialty expertise.
 - Processes designed to withstand procedural challenges.
- **Multiple Levels of Review Available**

- **Screening Panel:** Radiologists review the deidentified exam as part of routine workflow, unaware it is under legal review (ensures true blinding).
 - **Expert Panel:** A group of retained radiologists reviews a set of five exams (including the case in question) and assesses whether the original report met the standard of care; available for deposition and trial.
 - **Expert Review Set:** A single expert reviews ten exams (including the case) in one of three ways—Impressions only, Standard of Care, or Integrated review; expert available for testimony.
- **Credibility of Expert Witnesses**
 - Radiology experts come from a blinded, bias-free process.
 - Increases persuasiveness and defensibility of expert testimony.

“Trusted Imaging. Transparent Process.”

“Unbiased Radiology. Credible in Court.”

“Where Medical Integrity Meets Legal Strength.”

“Blinded Reviews, Trusted Outcomes.”

“Objective Imaging. Defensible Results.”

“The Standard of Care, Proven in Litigation.”
